

SUCCESSION to Mr. C. W. MOORE
MICHAEL SMITH,
M.A., LL.B.
BARRISTER, SOLICITOR, and
NOTARY PUBLIC.
CARSTAIRS, Alta.
At CROSSFIELD THURSDAYS.

THE CHRONICLE

VOL. X. NO. 43.

CROSSFIELD, ALBERTA, FRIDAY, OCTOBER 26th, 1917.

PRICE \$1 A YEAR.

Why Canada Needs More Money

UP to date the war has cost Canada about \$700,000,000.

Canada has spent in Canada over \$400,000,000 on her own account.

Canada has spent in Canada on behalf of Great Britain over \$300,000,000.

What Canada spends for Great Britain is really loaned to Great Britain and will be repaid or credited to Canada later on.

Great Britain needs so much ready cash to finance her own expenditures at home for herself and for our Allies that she must buy on credit from Canada, and from every other country where she can get credit.

Of course Great Britain's credit is so good that other countries, in order to get her trade, are quite as willing to give her credit as we are in Canada.

Canada wants to help Great Britain not only because Canada wants Britain's trade but because we are Canada and she is Great Britain—both members of the same great Empire, kin of our kin, our motherland.

For Canada it is both a filial and patriotic duty to supply Great Britain's war needs and remember, her needs are our needs. Also it is in Canada's self-interest to supply those needs and thus keep open a market for our products.

* * *

Now, Britain needs our wheat, our cheese, cattle, hogs, and many manufactured articles.

Canada also needs many of these things—between the two it amounts to more than a million dollars a day in cash.

And the producers must be paid in cash.

Neither Canada nor Great Britain could go to a Canadian farmer and buy his wheat or his cattle on credit.

The farmer and all other producers might be ever so willing to give their country credit but they could not do it because they have to pay cash for wages,

for rent, materials, etc. They must be paid in cash, or its equivalent.

So Canada says to Great Britain:—"I will lend you the money so that you can pay cash to Canada's producers for what you want.

"I will borrow this money from our own people just as you borrow money from your people.

"I will also borrow from the people of Canada money to pay cash for all the products that Canada, as well as Great Britain, needs in Canada."

That is Canada's practical, patriotic part in helping to win the war.

Without this credit the Canadian producer could not sell to Great Britain, and without these Canadian products the war would be prolonged.

So it is necessary for Canada to give to Great Britain the credit in order that Canada's own producers, who need a market, will have one; and in order that Great Britain which needs the products to win the war, will get them.

* * *

Now how does Canada get the money by which both Canada and Britain can pay cash for Canada's products?

By borrowing it from the people of Canada through the sale of Canada's Victory Bonds to be offered in November.

That is why Canada's Victory Bonds are offered to the people—to raise money to help to finish the war.

"Canada must keep her shoulder to the wheel even though it be a chariot of fire," and the way for Canada to keep her shoulder to the wheel is by buying

Canada's Victory Bonds

Next week this space will tell why Canada raises money by selling Canada's Victory Bonds

Issued by Canada's Victory Loan Committee in co-operation with the Minister of Finance of the Dominion of Canada.

War Duties Made Easier

When Tasks are Universally Performed, Says Celebrated Canadian Business Man

Ottawa, Oct. 25th.—It is easier to perform a patriotic duty when the duty is

universally recognized and performed. This is the opinion of many keen observers who have recently come into contact with war time life in Great Britain and France.

A celebrated Canadian business man whose services have been availed of

several times in recent years by the British Government said recently: "I was greatly impressed, both in France and Great Britain with the cheerful endurance of conditions such as we Canadians will not have to live through here at the end of the war." It seems to me that the public mind had become made up and set with the concentrated will power of millions of people,

so that war duties did not produce the reaction one might have expected from a naturally peace-loving people."

To explain the popular war service which, in Great Britain and France, has astonished the world, this gentleman quotes the familiar phrase, "Everybody's doing it."

Meeting at Crossfield to Organize for Canada's Victory Loan

Everybody is Called for Aid in this Effort

On Wednesday afternoon a meeting was held in the I.O.O.F. Hall for the purpose of organizing Crossfield district in the interests of Canada's Victory Loan.

Mr. A. A. Hall was appointed chairman, after a few remarks he called on

Hon. C. W. Fisher who said in part that his business was chiefly to introduce Mr. Howard, of Calgary, who had been appointed Deputy for the Carstairs, Didsbury, Banff, Cochrane and Crossfield districts.

The loan that was being called was for \$1,000,000 and would be called Canada's "Victory Loan."

Those loans that had been raised had been very poorly responded to by the country people but had chiefly been raised by the big corporations and financiers.

The present loan it was expected would be subscribed by the people. England had financed Canada in a many million dollars, and owing to the great amount of money it was costing to carry on, she was no longer able to do this.

It was the duty of Canada to raise her own loans in the future. This was only the forerunner of other loans.

The money was principally required to finance the present crop. The government, in order to procure a large amount of grain, they would have to have the money to pay for it, and it was the duty of everyone to do all they could. He had great pleasure in introducing

Mr. H. A. Howard, in his remarks said: This will be the fourth loan, the former ones had chiefly been raised by the bond-brokers and stock-brokers, but it was expected that the "Victory Loan" would be subscribed by the people of the Dominion. The United States was raising their second loan of three million dollars. There had been a committee formed in Southern Alberta comprised of the following gentlemen:

Chairman, William Tool ; Vice-Chairman, G. R. Warnock ; Secretary, Hobart Allen ; Treasurer, J. B. Sutherland ; Deputy for Crossfield, Carstairs, Didsbury, Banff and Cochrane districts, H. A. Howard, of Calgary.

This committee had charge of Southern Alberta, every member of which was devoting his time gratuitously. Twelve or fourteen deputies had been appointed to organize the districts, and his business was to form a committee for the Crossfield district. This will be the biggest thing that has ever been undertaken in Canada, and it had to be brought to a successful issue. The Chairman and Secretary appointed for this district should be men who could devote considerable time to the work. Then they would have to divide this district into smaller areas, canvassers would have to be appointed and these canvassers would be the only people who would be paid. The speaker went on to explain the particular work these would have to do.

The Government was undertaking on behalf of this loan the biggest advertising campaign that had ever been known in Canada. The loan itself would bear 5½ per cent. interest, and bonds for different amounts to run for different periods are being issued.

It would be to the interests of the farmers to do all they could to push forward this loan as the Imperial Government is purchasing the products of the country, and not having the money, so the money has to be raided by some means.

A. A. Hall : In commenting on the small attendance, said that when you asked the farmers to attend a meeting their excuse was that they had no time. They were probably here before this war is over that they will have no time, and perhaps something more.

A number of names were suggested for the committee, and it was decided to call a meeting to appoint committee at 3:30 on Saturday afternoon, 27th Inst., when it is hoped there will be a good attendance.

HAVE YOU A BAD SORE?

If so, remember these facts—Zam-Buk is by far the most widely used balm in Canada! Why has it become so popular? Because it heals sores, cuts, skin diseases, and does what is claimed for it. Why not let it heal your sore?

Remember that Zam-Buk is altogether different from the ordinary animal fats. Zam-Buk contains no trace of any animal fat, or any mineral matter. It is absolutely herbal.

Remember also that Zam-Buk is at the same time healing, soothing, and antiseptic. Kills poison instantly, and all harmful germs. It is suitable alike for rank infections, skin diseases, and for chronic sores, ulcers, etc. Just how different and superior Zam-Buk really is! All druggists and stores at once, buy "The real Zam-Buk Soap." Never before has there been such a product for freckles. Best for baby's bath. 25c. tablet.

Shell Explosions Cause Skin Diseases

Dermatology of War Differs From That of Peace, Says Medical Man

According to the experts correspondents of the medical Board, who under date of July 30, write on "Dermatology of the War," skin diseases vary greatly, in war and peace. Exposure to the heat of battle, however, bears responsibility also for cases of psoriasis, a disease characterized by an eruption of circumscribed patches, red color covered with adherent white scales. Here is part of his letter:

"The diseases of the campaigning soldier differ greatly in kind and frequency from those encountered in times of peace. In the dermatological clinic of the Paris Hospitals before the war, we would encounter the most frequent forms of dermatosis, eczema, scabies (itch) psoriasis, and tuberculous trouble under the name of varicose form. Today our men, however, these diseases are rare, being replaced in order of frequency, by phthirusian (parasites), ectoma, and trichophytous diseases (diseases attacking the hair), oftentimes marked by varied peculiarities."

"Tuberculosis and tuberculosi of the skin are rare, but are of astonishing interest when it is acquainted with the rigorous care with which tuberculous subjects were eliminated by the medical examiners as the soldiers present themselves for their service. The army life and exercise in the open air, the nourishment, good in quality and quantity, have undoubtedly great influence in the development of the attenuated forms of tuberculosi of the skin."

Procrustes

Effort is chiefly lost through inexperience. The men who know the most haven't done as much for the world as the men who do the most. Waiting until tomorrow? You destroy the world, you shorten more lives, and annihilate more armies than the power of enmity.—Herbert Kaufman.

The Man Behind the Plow

Great Services Rendered in Time of National Crisis

That country gentleman have made mistakes in the past in their attitude towards their land is true enough, those of the common good, those above military age serving all day serving in the ranks, and the others serving in the ranks when they could not at once serve as officers. The yeomen of England, and landlords of the realm have ever had in war the same tradition of service, and for this reason in his history of Henry VII., Lord Bacon speaks with the greatest enthusiasm of the hereditary power that Henry exercised for the state by establishing on the land "men of some substance, that might keep their servants, and set the example going on." This was a fully concern the might and mannerhood of the kingdom, to have farms as it were of all kinds, sufficient to support the whole body of the nation, and did in effect ameliorate a great part of the lands of the kingdom under the hold and occupation of the yeomen. This was a condition between gentlemen and cottagers or peasants." From this Tudor wisdom may we count family books, and the like. Thus did the king severely say His teeth; whereupon, according to the poet's fiction, should rise up bold men for the service of the kingdom?"—Saturday Review.

WOMEN! IT IS MAGIC!
LIFT OUT ANY CORN

...a few drops then lift corns or calluses off with fingers—no pain

Just think! You can lift off any corn or callus without pain or soreness.

Frenchman has discovered this other compound and named it free zone. Any druggist will sell a tiny bottle of freeze zone, and you should get very little cost. You simply apply a few drops directly upon a tender corn or calus. Instantly the soreness disappears, and shortly you will find the corn or calus so loose that you can lift it right off.

Frozenzone is wonderful. It dries instantly. It doesn't eat away the corn or calus, but shrivels it up without even irritating the surrounding skin.

Hard, soft or corns become tender to touch, as paint can lift them off. There is no fear before or afterwards.

If your druggist hasn't frozenzone, tell him to order a small bottle for you from his wholesale drug house.

How "Sammees" Originated

Just how the Yankees troops in France got the name of "Sammees" no one knows. The welcoming French shouted enthusiastically, "Vive les amis!" pronounced "Vive les sammees!" though instead of cheering arriving friends the crowds were giving them a nickname referring back to Uncle Sam. It was a queer fill the queer if the unknown sticks—Boston Globe.

Minard's Liniment for Sale Everywhere.

Marvels of the Telephone

Listening to the Atlantic and Pacific Simultaneously

A remarkable demonstration of the telephone was recently made for the benefit of Lord Northcliffe and his party. A point of historical interest was the listening by the distinguished Englishman to the radio of the Atlantic and Pacific oceans simultaneously. A telephone was connected to the transatlantic line reaching to San Francisco, and the line had for the occasion been extended to a telephone transmitter on the shore of the Pacific at the Golden Gate. Another telephone was connected to the line extending to a transmitter on the shore of the Atlantic. Thus by placing his ear to one receiver he was able to hear first one ocean and then the other, and by placing a receiver to either ear he was able to hear both oceans simultaneously.

Silver Bullet"

Very Effective

How to Strike the Hun a Severe Blow

It is not necessary to travel to Germany to strike a blow against the Hun. In the days of civilization, some very effective work can be done at home. Of course, the most meritorious service is that done by the brave men who don the khaki and go to the trenches. They risk their lives and endure separation from all they love. But a dead Hun does not mean that fighting with the Hun or bayonet is the only way to make the enemy reel backwards and finally collapse.

Money is a weapon of terrific power in modern war, much more powerful than it ever was in the past. This is why Germany is more vulnerable to the hammering of money, comparatively speaking, than to the hammering of steel shells. As Lord George said many months ago they can't stop us, and the Hun can't stop us. Thus did the war go without saying that the more silver bullets there are to be discharged, the sooner the Hun will be dislodged.

Dominion of Canada war savings certificates are Canada's "silver bullets." Each one of them is aimed straight for the Kaiser's heart.

No matter how deep-rooted the Hun may be, it must yield to Holloway's Corn Cure if used as directed.

Land for Veterans

In the British house of commons the Hon. Hunt complained that the board of agriculture was not making proper provision for the settlement of sailors and soldiers after the war. He emphasized that Australia and Canada are producing a great land to be had from the United Kingdom besides those from the Dominions, especially, under-secretary for agriculture, the Hon. Sir J. T. Wilson, recently secured practically the whole of 8,000 acres which the act of 1915 empowered him to give away for this purpose. It might be necessary to ask additional powers after the recess. The question was not difficult as the government had a small capital besides their pensions and were able to take up small holdings.

To safeguard the child from damage that worms cause, use Miller's Kidney Pills. These remarkable pills will clear the system entirely of worms, will regulate and stimulate the organs improved by exercise.

Says Hindenburg a Colossal Failure

Col. Repington, military critic of the London Times, reviewing the last year of the war, declares Hindenburg's policy was a failure. He says, "After revising any fresh strategy against the great allied powers, unable to take advantage of the gift of war, he offered himself on the west front the German armies had not won, but always gone back."

Minard's Liniment Cures Dandruff.

Full Weight of Hostility

China's declaration of war against Germany, will not greatly affect the situation in Europe, writes the Berlin press to fresh expression of contempt and abuse. But in the end Germany will be made to feel the full weight of all the losses it has incurred throughout the world by its policy of the past three years. If there are any far-sighted statesmen in Germany, they realize that when it enters upon the world's recovery after the war it will have no friends left anywhere, and its conduct will bring foreign countries will be in such a position to minimize its powers of recuperation.—New York World.

Do you always let your wife have her own way?
Yes, and mine, too.—Louisville Courier-Journal

Poultry Disease Preventable

War Conditions Make it Imperative That Farmers Keep Chicks From Dying

At least fifty per cent. of the chickens, young ducks and turkeys, and tame pigeons die each year from diseases, many of which are preventable. This is an annual national loss of probably millions of dollars that could be avoided to a large extent.

War conditions make it imperative that farmers and poultrymen, as far as possible, stop raising enormous flocks and in order to arrest this connection Dr. Wickware suggests that every breeder pay strict attention to the general condition of his flock in order that any sick birds may be immediately isolated. What is unusual is noted in the flock. It is important to place the affected individual in separate quarters. If within a short time recovery does not take place, it is unwise to destroy the flock at first because of the cause of the disorder. The prevalence of disease is more often the cause of the poultry-keepers' trouble than is the lack of practical knowledge. The cardinal importance of keeping the quarters clean; isolation of all ailing fowls and immediate action in regard to finding out what caused it can not be strongly impressed upon the poultryman.

When trouble occurs, forward to the Biological Laboratory, Central Experimental Farm, Ottawa, Ont., a live but sick fowl or in the absence of such, a dead bird. In the interval between the quietness of the drinking fountains and feed dishes to check the spread of the infectious disease. Disinfect the poultry houses by spraying with lime water plus one pound solution (5 lbs. stone lime slaked in a barrel of water plus one gallon of a good commercial disinfectant).

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal hot summer months are to small children. Cholera, diarrhea, dysentery and stomach troubles are the chief causes of death in children. The best way to prevent these diseases is to keep the children clean; isolation of the Tablets prevent stomach trouble, or if trouble comes with the tablets—use the tablets daily. Through the tablets will help to remove the intestinal parasites.

The Lady Visitor (to friend just married)—So you are not going to have any babies? The Artist's Wife—Good gracious no! It's most interesting! Jim paints and I cook. Then the game is to guess what the things are meant for. London Opinion.

There is more Cataract in this section of the country than in any other, and for years it was supposed to be due to the prescribed local remedies, and by constantly applying them treatment was pronounced incurable. Cataract is a constitutional condition and therefore requires constitutional treatment. One cause, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, taken internally. It is taken internally that Hall's Cataract Cure fails to cure it.

Which Goes to Prove That There Is One Born Every Minute

Far be it from us to hint that anything of the sort could happen in this country, but we see by The Times that a New York grocer said to Shirley Burns: "I don't like a cash business. We have a high-class trade, but they think we are not good enough. They don't bother to itemize items, and if my sales for the month don't come up to my expectations I add a few cents to the bill to cover it. I think what I thought it to be. Only a few people kick on the addition and they are highly pleased when I make the adjustment."

Moral: There is one born every minute.—Chicago Tribune.

Asthma Brings Misery but Dr. J. Hollis' Asthma Cure with Wounds Relieved.—Inhaled as smoke or vapor it reaches the very moist recesses of the bronchial passages and soothes them. Restriction passes and gas breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

Don't Use Rhubarb Greens

Being advised that certain persons advocated the use of rhubarb leaves green and the disastrous results we followed the advice of the U.S. department of agricultural pronounces decidedly against their use. Any person that uses rhubarb versus poisons the leaves contain substances which when used as food develop serious poisoning in many persons.

Avoid imposition by always, everywhere, asking for EDDY'S.

Captain Frightened German Cruiser

Commander D. R. Kinneir, of the Pacific Steam Navigation Company, has died suddenly in Liverpool. Early in the war, he distinguished himself by successfully navigating the little Argus 8000 tons through a hundred miles of uncharted and dangerous waters in the Straits of Magellan, South America, to escape from a German cruiser which had not been able to catch him. Thus daring saved not only his ship, but also the services of 300 French reservists who were on board. For gallant service, he was awarded the King, a gold watch from the French government, and among other recognitions of his exploit, a silver Union Jack subscribed for by children.

"I am proud to say that my grandfather made his mark in the world," said his son, Mr. D. R. Kinneir. "Well, I suppose he wasn't the only man in those days who couldn't write his name?" replied his friend.

Americans Ruin

Nervous System Life Insurance Companies Say Health Is Deteriorating

We Americans, it seems, are little better physically than a race of hooligans. Our muscles are flabby from lack of use and our nervous systems and digestive organs are ruined from excesses. We are mostly too fat, and our average span of life is only 50 years. Yet, despite these facts, those discriminating companies who write life insurance and have the differentiating of good, bad and indifferent life risk to a science, admit that they have never written more insurance upon American risks than upon the people of all the rest of the world put together, though the American population is only about one-fifteenth of the whole.

Those are a few of the facts revealed at the recent meeting in New York of the National Life Insurance Presidents. The 200 delegates represented about 80 per cent. of the larger companies of the United States and Canada which place approximately 90 per cent. of the 24 billion dollars of old life insurance now in force in this country. —New York Herald.

WOMEN WHO SUFFER

Can Obtain New Health Through the Use of Dr. Williams' Pink Pills

Every woman at some time needs help. At spots where unusual arrangement of words will indicate to the eyes of the initiated, his whereabouts and the judicious disposal of pyramids, the same salutary purpose, have been practised everywhere. It was, however, reserved for a certain general, in a certain regulation, to call attention to make the censor to gain protection. The corporal had ideas of bayonet fighting and, lacking opportunity to win recognition, for the sake of a long disquisition, sent the subject to his mother. Within a few days he was ordered to take the whole company in battle array. Having at instant success, got his third stripe and was placed in charge of that branch of the company's training.—Christian Science Monitor

Won Promotion Through Censor

The devices of the soldier at the front for evading the censor are legion. They can tell all that their arrangement of words will indicate to the eyes of the initiated, his whereabouts and the judicious disposal of pyramids, the same salutary purpose, have been practised everywhere. It was, however, reserved for a certain general, in a certain regulation, to call attention to make the censor to gain protection. The corporal had ideas of bayonet fighting and, lacking opportunity to win recognition, for the sake of a long disquisition, sent the subject to his mother. Within a few days he was ordered to take the whole company in battle array. Having at instant success, got his third stripe and was placed in charge of that branch of the company's training.—Christian Science Monitor

Rub It in for Lane Back.—A brisk rubbing with Dr. Thomas' Electric Oil will cure lame back. The skin will become smooth and the oil will penetrate the tissues and give speedy relief. Try it and be convinced.

As the liniment sinks in the pain comes out and there are ample grounds for saying that its touch is magical as it is.

Natural Result

"I understand Blank doesn't stamp on it. He doesn't know he has married."

"Of course not; he gets fewer chances to talk than he used to."

Minard's Liniment Cures Colds, Etc.

Fighting in Clouds

In Flanders men fight underground in trenches and dugouts, while in Italy they bathe in the clouds on mountain tops and passes. On the one hand, the soldiers of Flanders have been born out of the rock as a defence against the enemy, who are obliged to advance over the open mud and water attacking.

Field guns are hidden in the gorges by means of cable way, and the wounded are sometimes removed by cable car. They have to work amid snow and ice, and at times heavy clouds descend over the mountains.

Often a tremendous explosion occurs, and when the clouds lift they will reveal a scene from which the top has disappeared. Mining operations have been suspended and the charge of explosives has altered the face of nature.—Montreal Mail.

"Nobdy can say our town ain't fit to live in," said Uncle Tom. "No, we asked new arrival. 'No,' cause we could build a monument to him."

Weak women find in Dr. Williams' Pink Pills the tonic exactly suited to their condition. In the front where they suffer and go to bedreadness—a condition which the Pills readily cure. These pills save the body from the effects of a bloodless condition, from years of misery, and afford prompt and permanent relief to the woman who is bloodless, and therefore weak. Mrs. Williams' "I W. W." slogan is well known to all.

—"After the birth of my second child I suffered from troubles which made mother will understand, about going to sleep. I went to a doctor who was attending me, said an operation would be necessary, but as I dreaded this and as Dr. Williams' Pink Pills had given me great help to my sister, I decided to take this medicine, and I can truly say that after taking the pills for some time they made a complete cure, and made life more enjoyable than I had had for a long time. I think every woman suffering from the ailments of our sex should give Dr. Williams' Pink Pills a fair trial. I know from my own case the great benefit that follows when I take them."

You can get these pills through your physician or druggist at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medical Co., Brockville, Ont.

Silents.—In trying to please a woman what is the first thing to do?

Cynics—Make a fool of yourself over her.

Relief for Suffering Everywhere

With whose life is made miserable by the suffering that comes from indigestion and constipation? No one knows easily this formidable force can be dealt with. These pills will relieve where others fail, because they are the surest of all painkillers.

Field guns are hidden in the gorges by means of cable way, and the wounded are sometimes removed by cable car. They have to work amid snow and ice, and at times heavy clouds descend over the mountains.

Often a tremendous explosion occurs, and when the clouds lift they will reveal a scene from which the top has disappeared. Mining operations have been suspended and the charge of explosives has altered the face of nature.—Montreal Mail.

Seemed a Mistake

"I told Uncle Tom he was getting too old and feeble to attend to business. Did he take it kindly?"

"He threw me out of the office."

Warts are disfigurements that disappear when treated with Holloway's Corn Cure.

British Derivatives

It is interesting to remark that Major Sir Frederick Maurice, who was quoted the other day as of opinion that the German peace proposals were a result of the fighting on the Somme, died yesterday at his residence of Frederick Denison Maurice, the famous English preacher.

In England, also, a minister's sons are liable to arrest if they are seen to be drunk.

It is not a minister's son, but his father was a Unitarian schoolmaster. He got his early education at Llanystud, a Church school, and was brought up from childhood in Dredfynydd, Criccieth, and lives, when at home, at Brynawelon. Etymologically speaking, these are pretty solemn facts.—Life.

"Do you, Mr. Stacks, think that a rich man can go through the eye of a needle?"

"Don't know. I will, however, advise that my lawyers have dragged me through some very small loopholes."

Old Dutch

Daring British Airmen

Attacks on trains are very popular with the British Flying Corps. In spite of the bad weather, Lieutenant Gordon Gould, flying from 2000 feet to 300 for the purpose of dropping a bomb on a munition train, which caught fire and blocked the line, was wrecked. Lieutenant Gordon Gould, attacked in a reconnaissance, was wounded in the leg. In spite of the intense pain he brought down one enemy machine severely damaged, and then calmly continued his appointed work.

Fairville, Sept. 30, 1902.
Minard's Liniment Co., Limited.

Dear Sirs.—We wish to inform you that we consider your MINARD'S LINIMENT a very superior article, and we use it as sure relief for sore throat, chest, &c. I would like to know if the price was one dollar a bottle, I mean it.

Yours truly,
CHAS. F. TILTON.

No Amateur

Judge—Were you ever arrested before?

Ragles—Honest, now, judge, do I look like I was a bad jest makin' myself?

Yours truly,
C. B. Armstrong.

Minard's Liniment Cures Distemper.

Visitors—How long are you in for?

Minard's—don't know sir.

Visitor—How can he be?

You must have been sentenced for a definite period of time.

Prisoner—No sir. Mine was a life sentence.

New switch to control an automobile's electric lights also serves as an automobile overload circuit breaker and saves the use of a fuse block.

Instant Relief for LIVER TROUBLE

No liver sufferer can fail to benefit from the use of Dr. Cassell's Instant Relief. Its action is natural as nature, as sure as science.

It is altogether different to ordinary liver stimulants and purgatives. These are taken by force, till it causes work at all without the daily dose.

Dr. Cassell's Instant Relief strengthens the liver and enables the system to cure itself.

Take Dr. Cassell's Instant Relief for constipation, biliousness, torpid liver, sick headaches, dizziness, specks before the eyes, flatulence and windy spasms, acidity, heartburn, impure blood, and that dull, torpid feeling which is a sure indication of liver trouble.

Ack for Dr. Cassell's Instant Relief.

Price 50 cents, from all Druggists and Storkeepers,

or direct from the sole Agents for Canada, Harold F. Hitchcock, 125 Yonge Street, Toronto. War tax 1 cent extra.

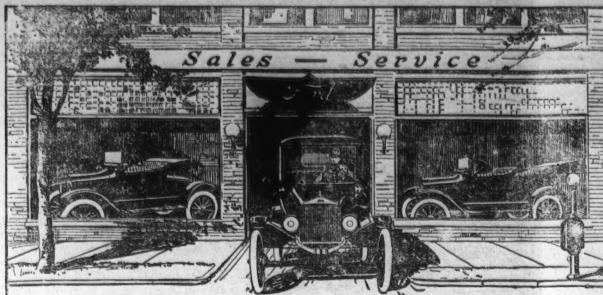

Dr. Cassell's Instant Relief is the companion preparation to Dr. Cassell's Tablets.

Sale Proprietors: Dr. Cassell's Co., Ltd., Manchester, England.

Complete Service to Ford Owners Everywhere

COURTEOUS attention to your needs wherever you may travel is something you appreciate, and being a Ford owner you can get it. You are always "among friends".

There are more than 700 Ford Dealer Service Stations throughout Canada. These are always within easy reach of Ford owners—for gasoline, oil, tires, repairs, accessories, expert advice or motor adjustments.

The cost of Ford Service is as remarkably low as the cost of the car itself. Nineteen of the most called for parts cost only \$5.40. Just compare this with the cost of spare parts for other cars and you will realize the advantage of owning a Ford.

Exemption Tribunals.

Exemption Boards have been chosen in such a way as to make them absolutely independent and removed from politics. There are 1,225 boards throughout the country, each composed of two men, one appointed by the court judge in the district concerned and one selected by a joint committee of Parliament. Being familiar with local conditions where they sit, the members are well fitted to appreciate such reasons for exemption as are put before them by men called up.

Exemption will be granted to those who can establish that it is in the national interest that they remain in civilian life. This is for the Exemption Board to decide after having received full information in each case.

The grounds on which exemption may be claimed (which are similar to the grounds recognized in Great Britain and the United States) are as follows:—

- (a) That it is expedient in the national interest that the man should, instead of being employed in Military Service, be engaged in other work in which he is habitually engaged.
- (b) That it is expedient in the national interest that the man should, instead of being employed in Military Service, be engaged in work which is of great value to the State and for which he has special qualifications.
- (c) That it is expedient in the national interest that, instead of being employed in Military Service, he should continue to be educated or trained for any work for which he is then being educated and trained.
- (d) That serious hardship would ensue if the man were placed on active service, owing to his exceptional financial or domestic position.
- (e) His health or infirmity.
- (f) That he conscientiously objects to the undertaking of combatant service and is prohibited from doing so by tenets and practices of his religion, in effect that all the duty, risk, and responsibility of any organization or religious denomination existing and whose record stands in good repute at such date, to whom he is in full accordance.
- (g) That he should be exempt because disbarred under the War Time Election Act.

No Claim for Exemption should be put forward unless one or other of these grounds in fact exists, and no loyal citizen should assist in, or allow himself to be made a party to, any Claim for Exemption unless thoroughly satisfied that it is made in good faith.

Exemption may be applied for by the men themselves or by their parents, near relatives or employers. Application for exemption must be made on printed forms to be found at every post office, and are to be sent to the Exemption Board, whose chairman will forward the forms to a Registrar, who will send it to the appropriate Exemption Board. In due time, then, the Applicant will get notice as to when he must present his case before the Board.

Issued by The Military Service Council.

Local and General

In another column of this issue will be found a notice calling a mass meeting of the citizens of Crossfield and district. The object of the convener is a worthy one, and it is hoped that the public will realize the fact and give their cordial support to this endeavour. We are living in critical times, and the sooner everybody takes fact to heart, the quicker will he shew his loyalty to the Empire in a practical manner.

Are you thinking of Christmas Cards this year? We have a splendid assortment of both Private and assorted Cards to choose from. Call at the Chronicle Office and look them over. Your boy or your friends at the front would welcome a card from you this Christmastide. Price range from 5¢ each.

Notice.—On and after the 1st of November next, all work done in my Blacksmith Shop will be strictly Cash.

A. JESSIMAN.

H. R. Raeburn, Milliner, of Calgary, wishes to thank the Ladies of Crossfield and vicinity for their liberal patronage during the past number of years, and to assure them of her continued efforts to highest satisfaction to her many customers. Would like also to remind them that she will make a second visit to Crossfield with full range of Millinery, also Ladies' Smart Tailored Suits and Coats. Your inspection cordially invited.

Enquire at Halliday's Store as to the exact date of arrival.

Classing Men For Services

Those in First Class Under Military Service Act are Placed in Grades.

Uncle Sam Deals With Hun Spies

Highly Developed Organization to Deal With Alien Enemies

Second-hand novelties of the past used to amaze readers who were ignorant of espionage to be revealed to breathless readers. Since the war began the ramifications of the German spy service have been disclosed, but in the future, perhaps, writers may find that the United States has more than its share of secret efficiency surpassing anything Europe has developed. One of its most remarkable features is that it is an organization that came into existence after the war had begun. The gun, and that only after the United States had entered the war were those in charge of the work given free hand. Only during the first few months have they had the incentive of patriotism to inspire them, because they have been faithfully to preserve the neutrality of the country. Their job then was like the job of an umpire; now they are in the game, and it is hard to stop.

A spy system had been repugnant to Anglo-Saxons from time immemorial. The word "spy" is in no better reputation than the word "hangman." Yet there have been so many instances that a spy is a necessary part of war; and perhaps if Great Britain had not a pre-war espionage system in the decade preceding the war might have been avoided. The public would have known what plots were hatching; even the purlins As a result, government officials have been forewarned. In the United States there was no spy system at all, and those few agents detected were those whose business it was to smugglers and counterfeiter, and to guard the person of the president. Legislators feared that unless the ultimate secret of the treasonous department and the department of justice were clearly defined by law, detectives might be employed by a president to catch his political enemies and "getting something on them." Circumstances with regard to their activities and status of the secret service and secret service was a sadly hamstrung organization when the war broke out.

The necessity for maintaining neutrality, that is to say, the necessity for foiling many of the plots of Germany and Austria-Hungary, the United States made it imperative that the secret detective force to be increased, and liberal appropriations were voted. When the United States entered the war there was not much set aside the amount of money that might be spent by Mr. D. Gregory, and A. Bielski, who was in charge of the secret service. In the three years of neutrality Mr. Bielski's men had conducted a number of operations in the United States which might be expected to be German agents. Against many of them there was no proof, nevertheless, more than 300 of them have been arrested in the past few months. Some of the prisoners have simply disappeared. Their friends and may know not whether they are living or dead. They are incarcerated in some federal prison and are all being cut off from the outside world.

The mystery surrounding the disappearance of these suspicious spies and the fact that there is no account to the American espionage system makes it inevitable that many reports as to the treatment of the spy system in the United States should arise. For instance, we hear of prominent Germans being told that in the journeys from their homes to the United States they shall not walk, or use motors. They must travel on the street cars, and some must not catch a club, but keep certain hours. They must, above all things, follow the advice of Mr. Gregory, and that they are probably a basis of truth for all these stories. The United States veterans take a round-the-clock method of arriving at its ends, and while it would be open to Germany thus shepherded to protest, it would be shot. There was no way to rescue them. No story of the German's treatment of women can be exaggerated. Ambulance men and soldiers agree on that.—From Minneapolis Tribune.

Products of Coal

Material Extracted Shows That No Waste Occurs in Nature

Coal seems to be rather an uninteresting material, and one cannot imagine that there are ugly black stones could afford anyone a subject worthy of study? And yet this same coal has given civilization many of its greatest achievements. The black pieces scarfs worn by women are colored with dyes that come from coal. The gas used to illuminate, and to heat houses is a product of this same coal. Valuable chemicals, such as benzene, naphthalene, and toluene, are coal products.

The tar used in our streets and roads, and rain is also a by-product of the commercial treatment of coal, and finally aniline, the basis of aniline dyes and coloring matter, is another product of the valuable chemicals contained in coal.

Coal is indeed one of the most valuable materials to be found in nature. To ascertain what is to be must be broken in the dim geological ages. The luxuriant vegetation of these past times, untrammeled by human hands, is one of the causes of the coal. It is over a year ago blossomed, faded and decayed, forming deep beds of rotted, woody fibre.

By degree certain gases, such as hydrogen and oxygen, were partly lost from the mass of vegetable material. Pressure and heat converted this material into what we know as coal.—St. Louis Post-Dispatch.

She—How is your daughter coming on with her lesson on the band?—He—Well, she makes out quite well, and is now absolutely out of touch with all sources of information on this continent.

Inhuman Hun Soldiery

"Princess Pat" Survivor Who Saw Crucifixion of Soldiers

Writing from Sandricourt, Oise, France, James H. Baker, a former member of the Tribune staff who served for a time in Paris, just to enter the American ambulance service with others of the Norton-Harris organization declares evidence which comes to him from every man among ambulance men and soldiers who have had personal contact with competent witnesses or have been questioned themselves more than two years at the front, that he has never before leaving home concerning German atrocities.

Letters to Minneapolis friends and relatives of his, and his diary and brief descriptions of his journey, his visit in Paris, and then his trip to Sandricourt, where the American ambulance men lately arrived, have been conditioning the public to the facts of Baker's letter from his son comes to The Tribune by courtesy of the Free Press. It follows:

"In Paris we saw how soldiers, most of whom wounded men leave and we were struck by the number of decorations. Of course, the French had been at war for three years and consequently thousands of these brave soldiers have been decorated for their great work against the Germans. We talked to some wounded soldiers, speaking to have these speak of America. One said, 'We are Americans, we love you' one said, 'When we learned that we were to do our little part by driving ambulances, he said, 'I will go with you.' Another said, 'I am a lousy dog.' And will you honor me by smoking one of my cigarettes?"

"That is the feeling towards Americans now, we found it the same. There were more American flags in Paris than French and 'Any American' is identified with a friend and cordiality that brings a lump to his throat. The French feel that with their great sister republic helping their cause of justice, certain of victory and pray God that their confidence and trust are well founded."

"Some gallant Americans have done great service for France and it is up to us to live up to their name and reputation. It is easy to understand why so many men would be willing to serve after hearing some of the tales which the ambulance men bring down from the front and catching something of the heroism of French people. We regret that our poor eyesight makes this impossible."

"Some fine stories of German atrocities are being written to be reported. And keep this in mind, any stories which you may hear of the Hun's cruelty to the wounded should be shot. There was no way to rescue them. No story of the German's treatment of women can be exaggerated. Ambulance men and soldiers agree on that.—From Minneapolis Tribune.

Use of Straw Gas Would Save Money

Saskatoon Professor Criticizes Formation of Council on Scientific Research

By carbonizing straw and obtaining by burning straw, farmers would have a large amount of money by using this gas for power, heat and light. This opinion was expressed by Dr. W. C. Clark, of the University department of the University of Saskatchewan, in a speech before the Saskatoon Engineering Society. Dr. Clark did not agree with the majority of the mechanical and industrial research council was organized and gave a lengthy argument, showing in his opinion, how it should be left to farmers utilizing straw

in the engine with only a slight change in the engine. From one ton of straw gas of 7,000 cubic feet of gas can be obtained. The power plant can be generated in the Canadian West from the straw from an average crop would equal seven times the power generated at Niagara Falls, he declared.

The development of the lignite situation in Saskatchewan and the straw problem should go hand in hand. He stated, "It is not possible at the present time to utilize straw on the farms, but the lignite could be used to advantage for heating and power purposes," he said.

When opening his address he pointed out that the Technical and Industrial Research Council was organized by the federal government and the Canadian government, and seven are from Eastern Canada, and one from west of Toronto. We are very glad to see that the council is a representative one," he said.

"Before the council was organized I had some ideas as to how it should be done. By the way this council is not to be regarded as it might be accomplished as it was organized along different lines," he continued. Dr. McLauren then pointed out that the council has only the task of making recommendations. He expressed the opinion that the council should have a fund behind it, supplied by the federal government, thereby it could make advantage of invention and discoveries made in the universities and laboratories of the country. By having a central place for inventors to meet a better position to encourage development of Canada's natural resources.

The council should run on a business basis, he suggested. He said the federal government should pay five per cent. on money supplied by the Canadian Bankers' Association, to the council until the fund was carried up. This fund should be controlled by a council composed of representatives from the federal government, the Bankers' Association, the Grain Growers Association, Chambers of Commerce and representatives of the universities. The members of the council he said should be elected by their organizations in each province, provinces and in each province science men should be organized for the purpose of acting in an advisory capacity to the council.

Using the present composition of the council, the speaker contended, in regard to any invention or discovery taken over by them, no protection could be given to them by the council or discoverer. Something should be done about this, he said. The council should have the power to receive a royalty or a share of the profits of his labor. From the inventions or discoveries certain proceeds should go to the fund and be controlled by the Canadian Bankers' Association and should be used to further laboratory work, help the teachers and young men who have not the means of taking advantage of educational opportunities in Canada.

He advocated the establishing of a council of scientific men in Saskatchewan to handle the problems of the province, especially the mineral deposits in the northern section.

"We need money to develop these resources. We have the brains and the men," he said.

Coming to the question of power he told the gathering that power can be obtained in Saskatchewan that will successfully light the entire province of Ontario in this furnace is 70 per cent. higher than the tests on Alberta lignite showed in Ottawa. "It is just a question of finding the right way of using it," said the speaker. "If lignite can be burned directly, it will give heat to many of the large cities in the country," he said.

Touching on the question of agriculture he said it is imperative that this part of the country obtain phosphates and other minerals in the soil. The northern part of Saskatchewan should be exploited to see if this can be found. He would do away with the importation of fertilizers from Ontario and the U.S.A., he concluded, if discovered.

There should be some supervision of the food supply, and also a better means of grading flour. He thought the system now used, that is cater-

ing to the fancias of the millers and housewives in regard to the color of loaves, should not be the means of grading wheat. One means of helping on this question is in this price control, in the establishing of a sample market in Saskatoon. He said this city has all the facilities, for that, of course, should be a state price control of the water power system he said and also the other resources should be investigated.—Saskatoon Star.

Police of Other Lands

The Preservers of Peace Have Their Peculiar Characteristics

It used to be said that each country could be known by the Jews who lived within its borders. In the same way every city can be judged by the quality of its policemen. In Canada the police are a bold and amiable citizen in a rather shiny coat and none too neat, who stands in the middle of the roadway and tries to stop the traffic.

In Stockholm the policeman is a well-dressed, broad-shouldered and pugnacious bruiser, and the rest of a disorderly person becomes an act of state. There the police represent the law, the full authority with a stern severity. He is the symbol of law and established order. Let no one touch these functions of a well regulated community.

In Copenhagen the policeman is neither the happy-go-lucky citizen who patrols the streets of Norway nor the creature of responsibility, glory like his colleague in Sweden. He strides a happy medium. In this he is an excellent representative of a land where the binational and allied living items have been brought to its highest perfection.

If only the chauffeurs of the Danish capital could learn to have a single complaint to make against a country where everybody seems well fed, where beggars are as scarce as winter snows, where the poor women live up to the best traditions of the charming china which is made in the royal residence of Denmark—Hendrik Willem Van Loon, in The Century.

Mysterious Ice Mines

Peculiar Formation of Caverns Responsible for Phenomenon

There are several caves in the United States where mines are used to burn bone char to make the soap suds.

During the late spring and summer ice forms, and a freezing temperature prevails but a winter comes on and instead of the cavern becoming milder, the ice gradually melts and a kind of subdued summer sun is under the surface.

On the surface of a peculiar cave is to be found at Coopersport, Pa., and one at Decorah, Iowa. The superstition among the residents of these localities is that the ice is safe to touch and look with suspicion upon any one daring enough to investigate these caves.

Edwin S. Balch, of Philadelphia, who has made a study of the subterranean ice mines as they are called, states according to his investigations the formation of the caverns is such that the cold air in winter does not penetrate and settle in them until late spring. During the spring thaws is keeping through the walls and roof. This water meeting the cold air freezes again, and as the temperature falls the fall season approaches, the warm summer air at last finds its way into the cave and melts the ice.

Using the present composition of the council, the speaker contended, in regard to any invention or discovery taken over by them, no protection could be given to them by the council or discoverer. Something should be done about this, he said. The council should have the power to receive a royalty or a share of the profits of his labor. From the inventions or discoveries certain proceeds should go to the fund and be controlled by the Canadian Bankers' Association and should be used to further laboratory work, help the teachers and young men who have not the means of taking advantage of educational opportunities in Canada.

He advocated the establishing of a council of scientific men in Saskatchewan to handle the problems of the province, especially the mineral deposits in the northern section.

"We need money to develop these resources. We have the brains and the men," he said.

Coming to the question of power he told the gathering that power can be obtained in Saskatchewan that will successfully light the entire province of Ontario in this furnace is 70 per cent. higher than the tests on Alberta lignite showed in Ottawa. "It is just a question of finding the right way of using it," said the speaker. "If lignite can be burned directly, it will give heat to many of the large cities in the country," he said.

Touching on the question of agriculture he said it is imperative that this part of the country obtain phosphates and other minerals in the soil. The northern part of Saskatchewan should be exploited to see if this can be found. He would do away with the importation of fertilizers from Ontario and the U.S.A., he concluded, if discovered.

There should be some supervision of the food supply, and also a better means of grading flour. He thought the system now used, that is cater-

Conserving Food Supply

United States Report Summarizes the Wheat Situation, Showing That Stocks are Low

The United States food administration has made the following statement:

The United States and Canada have a wheat deficit for this year of over 400,000,000 bushels in the case of the United States, and North America for the allied nations and neutrals of Europe, on a basis of normal wheat consumption; there, as shown by figures for a three year pre-war period.

The normal requirements of France, Italy, the United Kingdom and Belgium for the pre-war period were 380,000,000 bushels, and of the other cereals 345,000,000 bushels. To this should be added the estimated deficiency due to war in normal grain production of the order of 525,000,000 bushels, of which 196,000,000 are wheat making it necessary for these countries to import in the next twelve months a total of 377,000,000 bushels, and 674,000,000 bushels of other cereals if normal consumption requirements are to be met.

If the estimated wheat surplus for 1917 of the United States is 88,000,000 bushels, to which should be added the probable surplus of 120,000,000 bushels available from Canada, the United States will have an estimated surplus this year in excess of 829,000,000 bushels; and Canada a surplus of 119,000,000 bushels, or a total of about 350,000,000 bushels.

Therefore, on the normal basis of consumption the total allied wheat surplus requirements are \$57,000,000 bushels against \$35,000,000 bushels available from North America, or estimated surplus of 208,000,000 bushels, or 369,000,000 bushels in excess of the supply. From our United States supply we can take a certain amount for neutrals from whom we receive vital supplies, and also an amount for neutrals and our allies—a amount to better protect our stocks and to meet the requirements of our allies. Therefore, a deficit of 400,000,000 bushels in the amount necessary for normal consumption and necessary reserves.

While this situation is one of great difficulty and concern it must be met, and met by elimination of waste and reduction in wheat consumption and proper substitution of the art of allied people and ourselves; in one word, by an effective administration of the available supply.

In other countries in Europe, except England, the food supply is mostly for animal feed, the import necessities of the allies on normal consumption basis are about 600,000,000 bushels. North America surplus is 950,000,000 bushels. The necessary reserve for neutrals and increasing "carry over" will absorb all the margin. However, on the basis of our present crop prospects our allies will be able to supply their requirements in cereals other than wheat.

The allies are isolated from those markets, other than Canada and the United States, on which they were accustomed to rely before the war. The Russian supply cannot be got and therefore the allies are compelled to buy from Australia and India is three times as long and therefore more expensive. As much tonnage of shipping is required from North Atlantic ports. It is also twice as dangerous because of the long exposure to the Atlantic gales. There has been a large artificial famine in the new harvest from that quarter will not be available in Europe until spring. The allied countries are and have been for some time rigorously administering and economizing their food. In Belgium the relief committee has been compelled to reduce the consumption of cereals by nearly fifty per cent.; this brings the food supply so low that the population are again in a state of famine.

The allies are unable to use other cereals alone for bread. They can use them only as a supplement to wheat in universal use in European countries. Except in Italy, whose people normally consume much corn, our allies have few cereals and corn meal therefore cannot be shipped in great quantities. Moreover, for generations they have bought bread from their neighbors and have not learned to cook the bread well. Every American knows that it is impossible to distribute corn meal from foreign countries and is therefore necessary for us to furnish our allies sufficient wheat to enable them to have a wheat loaf.

However, they use use other cereals for making bread in their own countries and therefore cannot be shipped in great quantities. Moreover, for generations they have bought bread from their neighbors and have not learned to cook the bread well. Every American knows that it is impossible to distribute corn meal from foreign countries and is therefore necessary for us to furnish our allies sufficient wheat to enable them to have a wheat loaf.

10 CENTS PER PLUG

The Squire's Sweetheart

BY
KATHARINE TYNANWARD, LOCK & CO., LIMITED
London, Melbourne, and Toronto

(Continued.)

Pushing on again, he found himself among stubble fields, by a grove in which the stumps were chattering like a cascade of murmuring water. He heard a voice, and was aware of Mr. Langton's lean, erect figure coming towards him. It had time to note what ravages this last travel had made in a face already thin and careworn before Mr. Langton recognized him. So absorbed was he in his own heavy thoughts that he had all but passed when their eyes met.

A wintry smile came to the elder man's face, and he lifted up his hands in an effort at humorous amazement.

"My dear boy," he said, "I might have guessed that you would come."

"I am so sorry it is of no use. Margaret will not let you have her address."

"I did not ask that she should." A short, cold laugh burst from the lips of the natural brightness of Hilary was lifted. "I did not ask for her address. I should despise myself if I would do that. I came to see you. We are, in a sense, in the same boat. I needed sympathy."

Mr. Langton's hand went out and clasped Hilary's warmly. "That is good, dear fellow," he said. "Not that it is true. God forbid you should be in the same boat as I. I couldn't help it. Indeed I could not. When Margaret's letter came to me saying that her mother was dying, steadily and surely, what could I do? I did the best I did. I have only one thing to blame myself for—that I consented, because she was frightened, poor soul, to bring it privately to me. She took my dead mother's permission before she would consent to save her life. The thing ought to have been done differently; but it was her initiativite."

"Don't blame yourself, sir, even remotely. You did only what you should do. No such man had any hand who would hit his head up among his fellow men."

Neither spoke of the ordeal that had arisen from which Lady Smith would be saved.

"Now you are come, are you going to stay?" Mr. Langton asked, Hilary turning with him and they met the sea wind.

"As long as you stay, sir, if I am not a trouble to you. I will go back to London in a fortnight from now. I shall be very glad for you to stay. Where do you put up? At the Splendide?"

"I don't like the Chateau much; it is a great place, but it is not a pressing place. But till Mrs. Lloyd and her daughter leave there will be no room in the Marine. Why not get a bedroom in the village? There is only one at the Chateau. It will do me well enough. I have sent in a woman to scrub the floor of my bedroom and clear out a lot of old debris. I hope the Dultons will not mind."

"They hardly ever go into the Chateau. They don't think they like it. They praise it to conceal their dislike. It wants the fresh air of heaven let into it. I should eat down all that dense jacket of trees with its undergrowth."

They were on the top of the hill now, the sand dunes stretching away before them, the squat Norman tower of the church visible across just visible amid the shifting colors of the dunes, the sheep mere blobs, the red roofs of the village in relief against the background of sand and sea.

"A sinister looking place that," said Hilary with a nod of his head toward the farm where they were passing.

"Yes, with a sinister history. No one from the village round will pass it, if they can help it, not even in broad daylight. The old man who lives out there takes a mile of a round rather than pass *'Les Peupliers'*. A horrid place!"

Hilary seemed a superstitious lot about here."

"All peasants are superstitious. I'm afraid he's been rather gloomy. Wait till you meet Mrs. Lloyd. She knows pretty well the whole history."

of this coast. She'll tell you some eerie stories; but she has so some personality that she does not depress."

As they went down the hill from the farm house, suddenly they were arrested by something like a cry on the hill behind them. They stopped short, looked at each other, and turned about to stare at the solitary farm house. There was no response to the cry.

There was a dark shape against the gold and green of the sky, an image of loneliness on the wide stretch of the dunes.

"Did you hear a cry?" they asked each other.

Both thought they heard it but knew it was not of this life. They must have fancied it. Was the place laying its eerie spell upon them?

They went on again after a little pause.

"No one that we had surprised to come to the Marine, where Madame's cooking and the excellent service would make us perfectly happy," added Words failed Monsieur as he shrugged his shoulders and lifted his hands in a gesture of despair.

M. Hilar—it was not easy for M.

Dufour to pick up the first of the many names found on the new guest's luggage—would have plenty to do.

Lucky was Langton, who had his chamber a lit at the Chateau before dinner was ready. Monsieur had made a discovery. Monsieur bust

led out to meet them, full of cheerful bits of gossip picked up during the day. "Monsieur and Madame are to the Splendide. They should have come to the Marine, where Madame's cooking and the excellent service would make us perfectly happy," added Words failed Monsieur as he shrugged his shoulders and lifted his hands in a gesture of despair.

"I always think this scrap of wood smells like the jungle," said M. Hilar, as he stepped over a projecting root of a tree. "I have known this place for some time, though I have never slept in the Chateau de Beau. But it is full every summer of prosaic English people, with whom one would think nothing eerie could inhabit."

"I don't like it either," said Hilary. "Would you like to go to the Splendide, or to a lodging in the village?"

"Even I find this place nervy." "I shall sleep like a top, I assure you," said Hilary, "but I have known what it is to have nerves. The wood ought to be cut down. It is probably a perfect charnel house of old bones."

The door of the Chateau stood open. They went upstairs, passing one open door after another, showing a yawning blackness beyond. A cheetah-like glow of light shone through as they approached the room which Hilary was to occupy. Margot had been there and had done a work-new-scrubbed; all the draperies were gone; the window showed a clear half square of light where the upper

part looked above the trees; the fire had burned up and illuminated the room to its distant corners.

(To Be Continued.)

A Saner Path

U.S. and Britain Join Hands to Set the World on a New Path

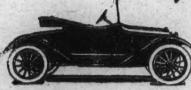

It is not democracy alone that is imperilled by Prussianism; it is civilization itself. What the reconquered parts of France did today, so the part of the world may be taken to set some limit to the unscrupulous use of military power by Germany. America, while preparing to wage the present struggle with all her might, looks beyond it to the prospect of a happier dissolution in all countries that may find security. That certainly is an inspiration that calls the full strength of British and American forces together. The United States and the British empire will go a long way towards realizing it; and the noblest outcome of their present close association ought to be, and can be, not merely the achievement of victory, but the hope of setting the world on a new and saner path.—London Daily Mail.

Gertie—You ought to get something for that cold, Bertie.

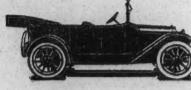

Bertie—Well, how much will you give me?

The New CHEVROLET Series

The Product of Experience

Chevrolet Model A "Roadster"

Chevrolet Model F "Baby Grand" Five Passenger Touring Car

Chevrolet Model F-A-2 "Royal Mail" Roadster

Chevrolet Model F-A Convertible Sedan

Power enough and to spare has made the Chevrolet Valve-in-head motor famous in all parts of Canada.

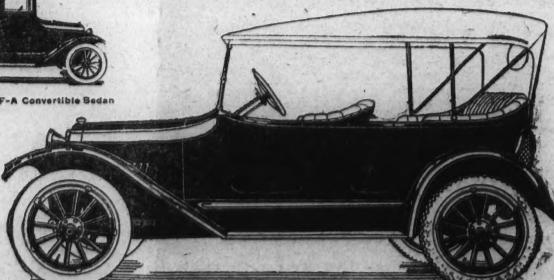

The phenomenal performance on Canadian highways has won for the Chevrolet FIRST PLACE in the minds of motorists who know motor car values.

So efficient have Chevrolet cars proven that our present production of the Chevrolet model "Four-Ninety A" of over 70 cars a day is inadequate to fill the demand.

Other larger models are being produced for men who want Chevrolet performance in a larger car.

A complete line of ten models includes a car for every class of buyer. Get at the facts before buying your new car.

Americans Advised

To Make Kraut

German Methods Must Be Used to Save Surplus of Bumper Crop

Uncle Sam has been forced to employ pro-German methods to save America's cabbage crop. To meet a general emergency, the Department of agriculture reported that tremendous rains have given us a bumper cabbage crop and unless thousands of tons of it are at once turned into sauerkraut it will be lost.

Despite this fact that we are at war with Germany, sauerkraut is so popular in this country that the market has taken a big jump. It is an easy and exceedingly profitable way to handle surplus cabbage. Last year a million dollars worth of cabbage went the sauerkraut route.

An Easy Pill to Take.—Some persons have experience to pillars because they do not taste. Parma's Vegetable Pills are set prepared as to make them agreeable to the most fastidious. They may eat, eat, eat, without tasting the relulsion that follows the taking of ordinary pills. This is one reason for the popularity of these cellulose tablets, but there is another, their high tonical quality as a medicine for the stomach.

Is An Outlaw Nation

Germany is an outlaw nation. Its government cannot be trusted. Its pledges are worthless. Its honor is a lie. Let us assume that the German government is not sincere in its promise to promise full reparation to Belgium. What would its promise be worth? How could we be enforced? We could not guarantee them. Does any sane man doubt that they would be repudiated if Germany could find a way to repudiate them?

At every turn we are confronted with the insurmountable obstacle of Germany's record.—From the New York World.

There are 7,000,000 farms in the United States.

Som-Mor Biscuit

Meets a War Demand

Most of us can give money—but soldiers need fine and we want to help. With but a day or two between us and our consumers, there is no need to buy biscuits in tins. SOM-MOR biscuits are packed in triple sealed, striped, cardboard cartons only, and reach you in the freshest condition. Give the soldiers tins and buy your biscuits in cartons. It's no sacrifice for you, and IT WILL help the boys. Ask for

Royal Arrowroot

in cartons, too.

The "Obstinate Nation"

What Britain Has Done to Save the Liberties of Europe

What saved the liberties of Europe at this juncture—Mr. Gerard makes no secret of it—it was the sudden entry of England into the war. For three years the "obstinate nation" (the Kaiser's words to Mr. Gerard) has kept up the war. For three years the British have cleared seas of German shipping. During three years it has built up vast armaments, finished half of Europe, and instead of half of those directions to assist France, has put into the field some millions of trained soldiers. British troops fought with the Turks in Asia Minor, British troops pressed from the Persian Gulf into Bagdad, driving the Turks before them. British troops fought the Turks in the Balkans, took Constantinople, and advanced to the walls of Jerusalem. British troops kept the Turks busy in the Gallipoli, during which time the British had sent 100,000 men to help hold up the Bulgarian attack. And yet the bargain with the Dual Alliance was the "British fleet must not interfere with Russia, and our a few divisions to reinforce the French across the channel." The British have broken all of the German conspiracy, and how it has miscarried, more completely than Mr. Gerard. And the story of that conspiracy as he is telling it to the world today is something that should be known by the world—Christian Science Monitor.

An Inch of Rain

It Means That Over 113 Tons of Water Per Acre Has Fallen

You have often seen the statement that one rainfall during the past week has been so many inches. Do you have any idea of what this means? Few people have, remarks London Tit-Bits.

You read in the weather bulletins that two or three inches of rain may fall in a day, but the figures really convey very little information and give me idea at all of the magnitude of the rainfall.

As a fact, containing 6,072,640 square inches of surface, and an inch of rain means, therefore, the same number of cubic inches of water. A gallon contains 231 cubic inches, so a gallon, and an inch of rainfall means 22,622 gallons to the acre, and as a gallon of water weighs ten pounds, the rainfall on an acre is 226,220 pounds. Counting 2,000 pounds to the ton, an inch of rain means over 113 tons per acre.

Oil for Toothache is no pain so acute and distressing as toothache. When you do so unfortunate visit apply Dr. Williams' Pink Pills, and as the oil is restored, its normal circulation evens symptoms will disappear. There are more people who owe their present state of good health to Dr. Williams' Pink Pills than to any other medicine, and most of them do not hesitate to say so.

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from Dr. Wil. Williams' Medicines Co., Brockville, Ont.

Children Starving

Pitiable Plight of Little Ones in Syria and Palestine

More than 50,000 children under 12 years of age, all dependent on outside relief for necessities of life, are starving to death, and about 10,000 orphans are in Syria, not including Palestine, according to reports of missionaries who recently arrived in New York. The pale, wasted, extremely emaciated bodies of many of these children could survive the coming winter if relief does not reach them in time. Substantial form than that of old Moore is silent.

In many instances, the missionaries, little children scarcely old enough to feed themselves, were left to their fate, working hard enough food to keep them alive, and fasting in the process. One of these girls, who had survived due to greater powers of resistance or to having been fed by their brothers who starved.
